

3D Surface Analysis Software MCubeMap

3D Surface Analysis Software

MCubeMap

MCubeMap is 3D surface analysis software for surface roughness and vision measuring machines. Clear imaging of analyzed data using diverse computer graphics technologies.

Extensive data operations and analysis features

Enables leveling, fill-in of non-measured points, form removal, BAC, peak distribution, lead (twist) analysis*, fractal analysis, and analysis of hole/peak volume, surface texture direction, etc.

* Measuring machine specifications are to be confirmed separately

• 3D view

• Particle analysis

• Surface texture direction

• Valley volume

• Groove

• Profile analysis

Inspection Certificate Creation Feature

Compliant with ISO 25178 3D surface texture parameter specifications, enables easy creation of reports with graphics and flexible layout of analysis results.

Conforming to ISO 25178-2 3D surface texture parameter specifications

ISO 25178	
Height parameters	
Sq	Root mean square height
Ssk	Skewness
Sku	Kurtosis
Sp	Maximum peak height
Sv	Maximum pit height
Sz	Maximum height
Sa	Arithmetic mean height
Functional parameters	
Smr	Areal material ratio
Smc	Inverse areal material ratio

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
