This is it! A small, lightweight, and extremely easy to use surface roughness measurement instrument that lets you view surface roughness waveforms right there on the color LCD screen.

● Registered design in Japan, China, and the European Union.
● Design registration pending in the United States of America.
The Surftest SJ-210 is a user-friendly surface roughness measurement instrument designed as a handheld tool that can be carried with you and used on-site.

**Easy to use**

- **2.4-inch color graphic LCD with backlight**
  The color LCD provides excellent readability and an intuitive display that’s easy to negotiate. The LCD also includes a backlight for improved visibility in dark environments.

- **Simple key layout**
  The Surftest SJ-210 can be operated easily using the keys on the front of the unit and under the sliding cover.

**Highly functional**

- **Advanced data storage capabilities**
  Up to 10 measurement conditions and one measured profile can be stored in the internal memory.

- **Optional memory card**
  An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions.

- **Password protection**
  Access to each feature can be password-protected, which prevents unintended operations and allows you to protect your settings.

- **Multilingual support**
  The display interface supports 16 languages, which can be freely switched.

- **Stylus alarm** (patent pending in Japan)
  An alarm warns you when the cumulative measurement distance exceeds a preset limit.

**Extensive analysis and display features**

- **Complies with many industry standards**

- **Displays assessed profiles and graphical data**
  In addition to calculation results, the Surftest SJ-210 can display sectional calculation results and assessed profiles, load curves, and amplitude distribution curves.
Color graphic LCD
Intuitive display that's clear, sharp, and legible.

Large, 2.4-inch LCD
The large LCD provides excellent readability.

Backlight
The backlight improves visibility in dark environments.

Operation keys
- The keys on the front of the unit and under the sliding cover are well-labeled and easy to use.
- The user-friendly screen layout and arrow keys provide intuitive operability.
- Displayed settings can be changed easily by using the left and right arrow keys.
  (Patent pending in Japan.)
- Infrequently used keys are hidden under the sliding cover to prevent unintended operations.

Drive unit
The drive unit can be separated from the display unit by using a cable, allowing more flexible measurement. The driver can be separated and reattached in one simple step.

Applicable standards
In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

Battery
The battery charges in one quarter the time of previous Mitutoyo products.

High-speed USB communication
Data can be transferred to and from a computer via the high-speed USB interface.

Memory card support
The memory card slot lets you store large amounts of data onto a memory card.

Multilingual support
The display interface supports 16 languages.
Many features in a compact body

**Extensive display features that assist measurement**

- The highly visible 2.4-inch color graphic LCD with backlight lets you see the screen easily even in dark environments.

- Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.

- The display mode can be freely switched between portrait and landscape.

- Calculation results are displayed in large characters.

**Advanced data storage capabilities**

- Up to 10 measurement conditions can be stored in the internal memory. Conditions can be quickly read according to the workpiece.

- An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions. *See page 10 for details about the memory card.

**Stylus alarm function**

- An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out stylus. Any value can be specified as the limit. *(Patent pending in Japan)*

**Easy setting**

- Displayed settings can be easily changed by pressing the left and right arrow keys under the sliding cover. For example, these keys can be used to switch the cut-off value (λc) and the number of sampling lengths (N) on the measurement screen. *(Patent pending in Japan)*

**Setting parameters and recalculating results**

- The required parameters can be selected from the screen. The sub-menu also lets you specify detailed settings such as the tolerance. After completing measurement, the parameters can be changed and calculation can be executed again* using the new parameters.

*May not be possible, depending on the measurement conditions.
Battery-powered portability scores when making surface roughness measurements on the shop floor.
Capable of performing measurements in any orientation, including vertical and upside-down. Optional accessories, such as a height gage adapter, allow measurements to be performed efficiently in various situations and setups.

*Refer to pages 8 to 11 for details of the optional accessories available.

A wide variation in system setup is possible with the detector + drive unit + display unit combination.

**Highly functional detectors and drive units**

The driver can be separated from the display unit and reattached in one easy step.

### Detector supplied as standard

Selectable from the following two items.

- Measuring force: 0.75mN
  Stylus profile: Tip radius 2µm
  Tip angle 60°
- Measuring force: 4mN
  Stylus profile: Tip radius 5µm
  Tip angle 90°

### Drive units

**Standard drive unit**

- Popular standard drive unit

**Transverse tracing drive unit**

- Best suited for measurement of narrow, shrouded workpiece features such as crankshaft, EDM parts, etc.
  (Patent Registered in Japan)

**Retractable drive unit**

- The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose profile cannot be easily seen, such as a blind hole, etc.

### Optional detectors

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

*See page 8 for details about the Detectors.

### Carrying case

A convenient carrying case is supplied as standard for protecting the instrument in the field.

### Measuring speed
- Measuring: 0.25mm/s, 0.5mm/s, 0.75mm/s
- Returning: 1mm/s

### Range
- 360µm (-200µm to +160µm)

### Skid force
- Less than 400mN

### Measuring force / Stylus tip
- 0.75mN type: 0.75mN / 2µmR

### Display languages
- Traditional Chinese, Simplified Chinese, Czech, Polish, Hungarian, Turkish, Swedish, Dutch

### Filters
- Gaussian, 2CR75, PC75

### Output display
- Measurement conditions / Calculation results / Calculation results for each sampling length / Assessed profile / Bearing area curve / Amplitude distribution curve / Environment setting information

### Customization
- Desired parameters can be selected for calculation and display

### Storage of measurement condition
- Save the conditions at power OFF

### Calibration
- Auto-calibration with the entry of numerical value / Average calibration with multiple measurement (Max.5 times) is available

### Power-saving function
- Auto-sleep off function (10-600sec) *3

### Size (W×D×H)
- Display unit: 52.1 × 65.8 × 160mm
- Drive unit: 115 × 23 × 26mm

### Mass
- About 500g

### Standard accessories
- 12BAA303: Connecting cable *4
- 178-605: Roughness specimen
- 12BAA643: Connect cable *4
- 12BAA644: V-type adapter

*1: Order the SJ-210 printer (No.178-421, optional accessory) separately. See page 10 for details about the SJ-210 printer.

*2: Standard deviation only can be selected in ANSI. 16% rule cannot be selected in VDA.

*3: Auto-sleep function is invalid when AC adaptor is used.

*4: For connecting the calculation display unit and drive unit.

To denote your AC line voltage add the following suffixes (e.g. 178-560-01A):
- A for 120V, C for 100V, D for 230V, E for 230V (for UK), DC for 220V (for China), K for 220V (for Korea)
Dimensions: Display Unit and Drive Unit

**Display unit, Drive unit**

- Drive unit stored inside display unit (Standard detector installed in drive unit)
  - Sliding cover: Closed
  - Sliding cover: Open

- Drive unit not stored inside display unit (Standard detector installed in drive unit)
  - Standard drive unit
  - Retractable drive unit
  - Transverse tracing drive unit

Enhances measurement efficiency by facilitating the measurement setup of multiple workpieces of the same type and of the hard-to-access sections of a workpiece.
Optional Accessories: For External Equipment

Printer for SJ-210

Assessed profiles and calculation results and curves can be printed out by connecting the SJ-210-dedicated printer, which is palm sized (W×D×H: 93×125×70mm) and can run on an internal battery.

- Power supply can be selected. (AC adapter or battery pack)
- Printable items: Measurement conditions, calculation results, assessed profile, bearing area curve (BAC), amplitude distribution curve (ADC), and environment settings.

Unit configuration:
1. Printer main unit
2. Printer connecting cable
3. Printing paper 6-pack
4. Battery pack 1piece
5. Exclusive use AC adaptor (with AC power cord) 1piece

Digimatic mini processor DP-1VR

By connecting this printer to the Surftest SJ-210’s digimatic output, you can print calculation results, perform a variety of statistical analyses, draw a histogram or D chart, and also perform complicated operations for X-R control charts.

No.264-504
To denote your AC line voltage add the following suffixes (e.g.264-504-5A).
- 5A for 120V, 5D for 230V (for UK), 5DC for 220V (for China), 5K for 220V (for Korea), 5F for 230V (for Oceania)

SJ-210 → DP-1VR Connecting cable
1m: No.936937
2m: No.965014

Memory card

A memory card for saving 500 measurement conditions, 1,000 measured profiles, 500 display images, text file, (measurement conditions, measured profiles, assessed profiles, BAC, ADC)

*Not all memory cards can be recognized. Please use the memory card recommended by Mitutoyo.

No.12AAL069

Printer for SJ-210 supplies
Printing paper (5-pack) No.12AAA876
Optional Accessories: For External Output

Simplified communication program for SURFTEST SJ series

The Surftest SJ-210 has a USB interface, enabling data to be transferred to spreadsheet or other software. We also provide a program that lets you create inspection record tables using a Microsoft Excel* macro.

- **Required environment**:  
  - OS: Windows 2000 SP4  
  - Windows XP  
  - Windows Vista  
  - Windows 7
  - *Spreadsheet software: Microsoft Excel 2000  
  - Microsoft Excel 2002  
  - Microsoft Excel 2007

*Windows OS and Microsoft Excel are products of Microsoft Corporation.

- The optional USB cable is also required.  
  - USB cable for SJ-210 series (2m)  
  - No.12AAL068

This program can be downloaded for free from the Mitutoyo website.  
http://www.mitutoyo.co.jp

Footswitch

A footswitch is used to trigger measurement. This tool is very useful in cases where you need to measure the same workpiece multiple times using jigs and other fixtures.

- No.12AAJ088

**Input Tool: Calculation results input unit**

Surftest SJ-210 calculation results can be loaded directly into commercial spreadsheet software via this unit simply by connecting it to the USB connector on a computer or a PS/2 type keyboard connector. (See Catalog No.E4250-264 for details.)

- USB keyboard signal conversion model IT-012U  
  - No.264-012-10
- PS/2 keyboard signal conversion model IT-005D  
  - No.264-005

**Protective sheets for the display**

Protective sheet for the color LCD (5 sets)

- No.12AAL066
