Non-rotating Spindle Type Digital Micrometer
Quickmike

1 revolution of thimble feeds the non-rotating spindle

10 mm!
Quickmike’s evolution to easier and speedier measurement!

Quickmike

Quick measurement 20 times faster feed rate

The Quickmike provides a speedy spindle feed of 10 mm per thimble rotation that enables widely differently sized features to be measured quickly. Also, 30 mm of wide measuring range, which is 5 mm longer than the standard type, allows measurement of multiple workpieces.

Protection level upgraded from IP54 to IP65

Resistant to oil, water, and dust ingress. Useful on the shop floor where coolant may splash on the micrometer.

COOLANT PROOF™ IP65

COOLANT PROOF is the universal term for Mitutoyo Digimatic Small Tool Instruments that are not only resistant to dust and water ingress but also to deterioration due to contact with the cutting oil or coolant fluids*1 in normal use.

*1: Some types of aggressive cutting oil or coolant may degrade the sealing materials over time.

Visibility improved

Extra-large LCD digits enable easy reading of measurement values.

Extended battery life

Low-power electronics have extended the battery life to 5 years in normal use*2.

*2: Typical, assuming average frequency of use and normal applications.

Absolute scale

The ABS (absolute) linear scale eliminates the need for origin point setting at every power-on and achieves high reliability while being free from overspeed error.

Function locking prevents misoperation!

Function lock enhances usability by preventing the origin from being accidentally changed during measurement.

Minimum-value hold function ensures measurement value is retained!

The micrometer spindle can be retracted from the workpiece while the measurement value is retained in the display until cleared.

Battery cap can be easily opened

The groove in the battery cap has been increased from 1.8 mm to 2.4 mm in width to enable the cap to be more easily opened.
## Specifications

### Common specifications
- Spindle feed: 10 mm per revolution
- Resolution: 0.001 mm
- Quantizing error: ±1 count
- Protection level: IP65
- Power supply: Silver oxide button cell battery SR44
- Battery life: Approx. 5 years under normal use
- Operating temperature: 5 to 40°C
- Storage temperature: -10 to 60°C
- Standard accessories: Silver oxide button cell battery SR44 (903888), 1 pc. supplied for testing purposes only.

### Optional accessories
- Connecting cable to DP-1VA LOGGER: 1 m: 05CZA662
- Connection with PC (wired communication): USB Input Tool Direct
- Connection with PC (wireless communication): Connecting cable to U-WAVE-T (160 mm): 02AZD790B
- Cable for foot switch: 02AZE140B

### Frequency Micro Meter
- Preset (ABS measurement system)
- Zero-setting (INC measurement system)
- Hold
- Function lock
- Auto power off
- Measurement Data output
- Error alarm
- Minimum value hold

### Dimensions

#### Crimp Height Micrometer

- For crimp height measurement of a crimped terminal
- Specifications:
  - Range: 0 - 15 mm (342-451-20)
  - Accuracy: ±3 µm

#### Disk Micrometers

- For root tangent length measurement of spur and helical gears
- Measurable range of gear pitch: 0.5 to 6 module
- Specifications:
  - Ranges: 0 - 30 mm (369-411-20)
  - 25 - 55 mm (369-412-20)
  - 0 - 1.2 in (369-421-20)
  - 1 - 2.2 in (369-422-20)
  - Accuracy: ±4 µm / ±0.0002 in
  - Flatness: ±1 µm / 0.00004 in

#### Blade Micrometers

- Blade type anvil and spindle for measuring narrow-groove diameters and similar features of round workpieces.
- Specifications:
  - Ranges: 0 - 30 mm (422-411-20)
  - 25 - 55 mm (422-412-20)
  - 0 - 1.2 in (422-421-20)
  - 1 - 2.2 in (422-422-20)
  - Accuracy: ±3 µm / ±0.00015 in
  - Parallelism: ±3 µm / ±0.00015 in

### Special-purpose types

#### Crimp Height Micrometer

- Features:
  - Preset (ABS measurement system)
  - Zero-setting (INC measurement system)
  - Hold
  - Function lock
  - Auto power off
  - Measurement Data output
  - Error alarm
  - Minimum value hold

#### Disk Micrometers

- Features:
  - Connecting to DP-1VA LOGGER
  - Connecting to U-WAVE-T
  - Connecting to USB-ITN-B

#### Blade Micrometers

- Features:
  - Connecting to DP-1VA LOGGER
  - Connecting to U-WAVE-T
  - Connecting to USB-ITN-B

### Common functions

- Spindle feed: 10 mm per revolution
- Resolution: 0.001 mm
- Quantizing error: ±1 count
- Protection level: IP65
- Power supply: Silver oxide button cell battery SR44
- Battery life: Approx. 5 years under normal use
- Operating temperature: 5 to 40°C
- Storage temperature: -10 to 60°C
- Standard accessories: Silver oxide button cell battery SR44 (903888), 1 pc. supplied for testing purposes only.

### Optional accessories

- Connecting cable to DP-1VA LOGGER: 1 m: 05CZA662
- Connection with PC (wired communication): USB Input Tool Direct
- Connection with PC (wireless communication): Connecting cable to U-WAVE-T (160 mm): 02AZD790B
- Cable for foot switch: 02AZE140B

### Setting standard (excluding 0 - 15/30 mm and 0 - 1.2 inch range models)

- Rust prevention treatment should be applied after use.

  - Connecting to DP-1VA LOGGER
  - Connecting to U-WAVE-T
  - Connecting to USB-ITN-B
Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
